

NIKITA WALVEKAR

AI Product Manager | GenAI & Agentic Systems

Bengaluru, India | +91 9158569543 | walvekarn@gmail.com
[linkedin.com/in/nikitaw3](https://www.linkedin.com/in/nikitaw3) | github.com/walvekarn | nikita-portfolio-site.vercel.app

PROFESSIONAL SUMMARY

AI Product Manager with 9+ years delivering automation and analytics products in regulated environments (banking, pricing, payroll, compliance), building GenAI and agentic systems since 2025. Owns the full product lifecycle: discovery, requirements, PRDs, roadmap, build, LLM evaluation, and rollout. Built and evaluated a GenAI complaint-classification POC at Wells Fargo (95% test accuracy, USD \$3M projected annual savings for a 160-person operations team) and delivered AUD \$12M in annual value, validated by finance, through SAP and Anaplan pricing automation at Diageo. Writes production Python alongside engineering teams and ships public repos with live demos. Seeking AI Product Manager or Technical Program Manager roles where AI is the core product.

CORE SKILLS

Product Management: Product lifecycle management, product strategy, product roadmap, PRDs, requirements gathering, user stories, product discovery, prioritization frameworks (impact, effort, risk), OKRs and KPIs, success metrics, stakeholder management, cross-functional leadership, go-to-market, Agile, Scrum, Jira

Program Management: Technical program management, risk and dependency management, release planning, cross-regional delivery, Lean Six Sigma (DMAIC), process automation

Generative and Agentic AI: LLMs (OpenAI, Anthropic Claude, Google Gemini), prompt engineering, RAG, embeddings and vector search, AI agents and agentic workflows, LLM evaluation and evals (per-category precision and recall, quality bars for model output), human-in-the-loop design, AI governance and guardrails, responsible AI, model cost optimization, LLMOps

Engineering: Python, FastAPI, SQL, TypeScript, Next.js, React, Docker, Streamlit, Supabase (pgvector), REST APIs, pytest, Jest, LangChain, n8n, Make.com, Vercel, Git

Data and Cloud: Microsoft Fabric (Azure), Power BI, Tableau, SAP, Anaplan

Domain: Regulated operations, audit and compliance, financial services, CFPB complaint operations, third-party and vendor risk, risk management

PROFESSIONAL EXPERIENCE

Founder and Principal AI Consultant | Gate 0 Consulting Studio | Bengaluru

Feb 2026 – Present

- Run an independent AI-automation practice delivering discovery-to-production engagements for founders and operators in fintech, legal, and compliance-heavy sectors across India, the US, and APAC.
- Own each engagement end to end: problem definition, requirements, solution architecture, prototype, evaluation, implementation plan, handover, and post-launch support, on fixed-scope 48-hour discovery-to-proposal cycles.
- Led go-to-market for GrowthPro AI (Apr – Jun 2026), an AI-search ranking engine for multi-location consumer brands across ChatGPT, Gemini, Perplexity, and Claude: designed the audit methodology, 4-week ranking sprint, and Day-30 verification framework.

Senior Assistant Vice President | Wells Fargo | Bengaluru

May 2025 – Feb 2026

GenAI and Automation, U.S. Consumer Operations

- Owned enterprise GenAI initiatives for U.S. Consumer Operations end to end: problem discovery with operations stakeholders, PRD, POC, evaluation, validation, and production-readiness review.
- Built and evaluated a GenAI complaint-classification POC reaching 95% test accuracy, with USD \$3M projected annual savings from cutting manual categorization from 3 to 5 minutes to under 2 seconds per complaint for a 160-person operations team.
- Designed confidence-based human-in-the-loop routing and full audit-trail logging to meet regulated-environment explainability and CFPB compliance requirements.
- Built the LLM evaluation framework: per-category precision and recall benchmarks surfaced weak performance on low-volume, high-stakes fraud categories; redesigned prompts and escalation thresholds to set the quality bar for model output.
- Delivered model-accuracy improvements and the business case for a GenAI PDF-extraction initiative; led initial Microsoft Fabric (Azure) migration setup, including data-gateway configuration.
- Standardized Pre-Legal and Post-Judgment workflow frameworks, improving audit documentation and operational clarity across regulated jurisdictions.

Assistant Manager, Pricing and Analytics | Diageo | Bengaluru

Oct 2022 – May 2025

- Product owner for internal pricing platforms across SAP and Anaplan for APAC and Australia: owned the roadmap, backlog, release plans, and stakeholder alignment across finance, commercial, and IT.
- Owned a Python-based SAP-to-Anaplan reconciliation automation delivered through Lean Six Sigma DMAIC, producing AUD \$12M in annual value validated by finance and freeing 2 to 3 FTE from manual work.
- Built governed Power BI variance-control dashboards and adoption KPIs, lifting pricing accuracy and control effectiveness 35% and cutting pricing-operations cycle time 60%.
- Led analytics delivery for a 6-member cross-regional team across time zones using Agile sprints and async documentation, improving release cadence 20%.
- Prioritized a 20+ item stakeholder backlog with an impact, effort, and regulatory-risk framework, making tradeoffs transparent and defensible to senior stakeholders.
- Recognized with the Johnnie Walker Blue Award (H1 FY23) and Gold Label Award (Q4 FY23) for automation impact.

Pricing Data Analytics Consultant | VARITE (consultant to Diageo) | Bengaluru

Apr 2022 – Sep 2022

- Automated 75% of pricing workflows in Python, reducing manual effort and operational risk; converted to a permanent Assistant Manager role within 6 months on automation impact.

Data Operations Analyst | Rippling | Bengaluru

Oct 2020 – Dec 2021

- Converted PEO operational workflows into scalable, analytics-driven systems; coordinated Workers' Compensation and Unemployment processes across 50 U.S. states for regulatory compliance at scale.
- Automated data pipelines and BI dashboards, reducing setup and processing errors 30%; supported forecasting and risk-profiling models for client insurance optimization.

Senior Process Associate | ADP | Pune

Mar 2019 – Dec 2019

- Designed Tableau dashboards for 18 clients, improving payroll visibility 40%; streamlined U.S. payroll audit and reporting to shorten the monthly close.

Senior Process Specialist | Principal Global Services | Pune

Mar 2018 – Mar 2019

- Built Power BI 401(k) dashboards delivering 20% error reduction and 99% on-time submissions; enabled automated reconciliation across key accounts.

Audit and Data Operations Specialist | Yardi Software India | Pune

Jan 2015 – Feb 2018

- Achieved 98% audit accuracy through automated reconciliations for real-estate portfolios; implemented data-validation frameworks enabling proactive exception handling.

SELECTED PROJECTS

Public repos at github.com/walvekarn. Live demos where deployed.

- **Agentic AI Compliance Assistant** (Python, FastAPI, Streamlit, LangChain, OpenAI API): Multi-jurisdiction compliance agent (Singapore, UK, UAE) with a 6-factor risk engine, Plan-Execute-Reflect loop with quality-threshold replanning, three-tier autonomy (autonomous, review, escalate), full audit trail, counterfactual what-if analysis, and 80+ test scenarios. Working prototype with mock-mode support; backed by a companion Compliance Rules Engine covering 10+ jurisdictions. github.com/walvekarn/agentic-compliance-agent | github.com/walvekarn/compliance-rules-engine
- **Legal PDF Extractor** (Python, pytest): Modular document-AI pipeline extracting structured fields from court filings with zone detection, confidence scoring, cross-validation, and a passing test suite. github.com/walvekarn/legal-pdf-extractor
- **Compliance Ops Toolkit** (Next.js, React, TypeScript, Jest, Vitest): Three deployed apps for third-party risk teams: exception tracker with audit trail and role-based actions, vendor risk scorecard dashboard with escalation triggers, and multi-step vendor onboarding wizard with validation gates. compliance-exception-tracker.vercel.app | vendor-risk-dashboard.vercel.app | vendor-onboard-stepper.vercel.app
- **ERP Connector Prototype** (TypeScript, Next.js, Vercel): Multi-system data-sync connector demonstrating ERP integration patterns. github.com/walvekarn/erp-connector-prototype | erp-connector-prototype.vercel.app
- **AI Todo Application** (Next.js, TypeScript, n8n, OpenAI): Natural-language task creation with automatic priority assignment, due-date parsing, and real-time semantic search. github.com/walvekarn/todo-app-challenge | todo-app-challenge-two.vercel.app

EDUCATION AND CERTIFICATIONS

- Executive Development Program, IIM Raipur, 2019 – 2020
- Bachelor of Commerce, Dr. Babasaheb Ambedkar Marathwada University, 2011 – 2014
- Certified Generative AI Mastermind, Outskill, 2025
